

Lulin Shen

Gothenburg, Sweden | sllsll2715@gmail.com | (+46) 728397802 | linkedin.com/in/lulin-shen

Summary

Results-driven Frontend Developer specialized in building scalable, responsive, and accessible web applications using React, Vue.js, TypeScript, and advanced JavaScript (ES6+). Expertise includes delivering high-performance digital products through Agile methodologies, CI/CD pipelines, robust testing practices, and close collaboration with cross-functional teams. Fluent in English, Mandarin, Swedish, and authorized to work across the EU.

Technical Skills

- **Core Languages & Frameworks:** React.js, Vue.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Sass
- **Development Tools:** REST APIs, GraphQL, Webpack, Tailwind CSS, Figma, Git, JIRA
- **Best Practices:** Agile (Scrum), Continuous Integration/Continuous Deployment (CI/CD), Unit and Integration Testing, UI/UX Design Collaboration, Accessibility Standards (WCAG)
- **Data Analysis:** Statistical Analysis (JASP), Data Interpretation, Hypothesis Testing, Data Visualization
- **Certifications:** Professional Scrum Master (PSM I)

Education

Master of Information Technology and Learning

University of Gothenburg, Sweden | Sep 2025 – Present

JavaScript Developer

IT-Högskolan, Gothenburg, Sweden | Jul 2020 – Jun 2022

Bachelor of Chinese Language and Literature

Chongqing Technology and Business University, Chongqing, China | Jul 2008 – Jul 2012

Professional Experience

Project Manager

Lens Technology, Taizhou, China | Oct 2024 – Dec 2024

- Led cost-optimization initiatives, coordinating with Global Supply Managers (GSM) to identify reusable and retrofittable equipment, significantly reducing project expenditures.
- Ensured seamless cross-departmental collaboration for equipment deployment, maintaining strict adherence to vendor compliance and organizational standards.

Frontend Developer

The Techno Creatives, Gothenburg, Sweden | Jan 2022 – Nov 2023

- Engineered responsive user interfaces with React, TypeScript, and Tailwind CSS, optimizing UX/UI in collaboration with designers, backend developers, and product managers.
- Delivered IoT-enabled web applications for clients like Rentr, Goboat, Clean Motion, and Roam, resulting in improved operational efficiency and enhanced end-user satisfaction.
- Streamlined Agile development workflows using Jira, leading to a 20% increase in sprint velocity and code quality through structured testing and systematic code reviews.

Frontend Developer Intern

Playground TV, Gothenburg, Sweden | Jul 2021 – Oct 2021

- Executed comprehensive bug-fixing and feature enhancement strategies, drastically improving site responsiveness and user engagement.
- Developed and launched new pages using WordPress and Figma, reducing website deployment times by approximately 25%.

Marketing Assistant

Crush Collection AB, Gothenburg, Sweden | Jan 2021 – Sep 2021

- Coordinated international social media campaigns with teams in Paris and Shanghai, increasing digital brand presence and customer interaction.

Notable Projects

- **Fleet Management App (Roam):** Developed intuitive, cross-platform front-end architecture using React, GraphQL, and TypeScript, enabling seamless real-time fleet tracking and achieving significant improvements in data rendering speed.
- **Electric Mobility Solutions (Goboat, Clean Motion):** Engineered responsive, high-performance user interfaces using React and TypeScript, ensuring seamless usability and accessibility across multiple devices in collaboration with UX designers.

Language Proficiency

- **English:** Full Professional Proficiency
- **Swedish:** Limited Working Proficiency (SVA03)
- **Mandarin Chinese:** Native — Licensed Chinese Teacher (Certificate No: 20136335132000013)
